Retest-adjusted longitudinal cognitive trajectories (Tucker-Drob et al. 2022)
Model-implied population-mean trajectories from the published growth-curve parameters (Tables 1–2), net of practice effects. SD = within-age SD at baseline. Dot = peak.
A. VCAP (Virginia, US) n = 5,566, baseline ages 18–99
B. Betula (Umeå, Sweden) n = 3,320, baseline ages 25–86
T score (50 at age 35; 10 points = one SD)
Age (years)
Perceptual speed (Gs) (declines throughout)
Abstract reasoning (Gf) (peak 25)
Memory (Gm) (peak 28)
Visuospatial reasoning (Gv) (declines throughout)
Crystallised knowledge (Gc) (peak 68)
Perceptual speed (Gs) (peak 36)
Memory (Gm) (peak 36)
Visuospatial reasoning (Gv) (peak 29)
Crystallised knowledge (Gc) (peak 49)
